Complete coverage in and around your home

Because you are speaking through your pendant, FreedomAlert allows you to communicate your message from every corner of your home, outside in the yard and in the driveway. Emergencies can happen anyplace. And just one button activation.

FreedomAlert's 2-Way Voice Communication Range

Typical Personal Emergency Response System's 2-Way Voice Communication Range as Speakerphone is in the Base Station

The world's first 2-way emergency pendant communicator

Emergencies can happen in all parts of a home and frequently right outside a home in the yard or driveway. So whether you are just checking in with a friend, need some quick help from a neighbor, or are in an emergency, your FreedomAlert pendant will allow you to communicate your message instantly and efficiently from anywhere in and around your home. All with ONE button activation.

Up to 4 user programmable contacts to call anytime

You can personalize the system with a flick of a three position switch on the base unit to:

1. Call up to 4 custom contacts
2. Call up to 4 custom contacts & then the 911 emergency operator
3. Or just the 911 emergency operator.

It's your choice.

Emergency operators are available as backup if needed

FreedomAlert can also contact a 911 emergency operator as a backup in case you cannot reach a family member or neighbor. This way you are completely protected 24 hours a day, 7 days a week. You are never alone with FreedomAlert.

Traveling?

Whether you are moving across town or going to visit the grandkids across the country, this is not a problem for FreedomAlert. Just unplug your unit from the phone jack and toss it in your suitcase. When you get to your destination, simply plug it into the local phone jack. No additional programming needed. And if you call 911, they will have the local 'caller ID' of that location.

Never pay a monthly, activation or set up fee again.

FreedomAlert is yours to keep and use forever. Once you purchase it there is nothing more to pay.
