Monitor Your Environment with Room Alert Provided by SELLCOM Inc

Room Alert

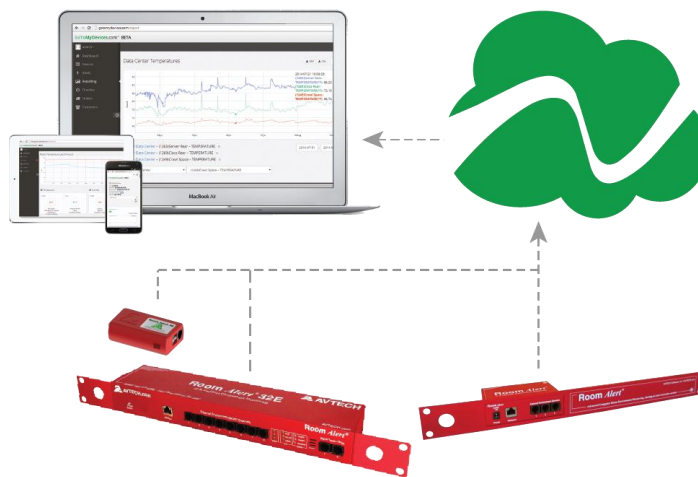

Room Alert monitors environment conditions such as temperature, humidity, power, flood/water, smoke/fire, air flow, room entry, motion, and more.

Sensors

AVTECH offers a wide range of sensors to monitor any number of environment conditions. No matter what type of facility you have, AVTECH sensors combined with Room Alert can protect your most important assets.

GoToMyDevices

Monitor unlimited Room Alert devices easily with AVTECH's GoToMyDevices cloud service. GoToMyDevices is accessed through any internet-accessible device, enabling users to see the status of their Room Alert at any time.

Available sensors can monitor:

- Temperature
- Outdoor Temperature
- Fluid Temperature
- Humidity
- Extreme Temperature
- Heat Index
- Main/UPS Power
- Flood/Water
- Current Loops
- Smoke/Fire
- Fuel/Water Tank Level
- Air flow, Sound, Light
- Motion, Room Entry
- Panic Button, Security

Almost 30% of business outages are caused by environment factors, costing companies nearly **\$300,000** in lost revenue and productivity. Temperature, humidity, flood, power, smoke, and other environmental conditions can negatively affect data centers, cold storage, manufacturing, and facilities of all types. Even a slight change in temperature or humidity, or the introduction of water or smoke, can spell disaster for valuable equipment, property, or your business.

AVTECH has been providing solutions since 1988 that proactively monitor the environment and help warn of changes that might cause problems. Room Alert is trusted to help monitor over 80% of the Fortune 1000, the United Nations, Pentagon, FBI, and thousands of facilities worldwide.

You can trust Room Alert, provided by SELLCOM Inc to help protect your critical facilities and assets as well.
